

ESTEDERM

KLINIKA AMBROZIAK

The patient is requested to undergo the following tests and furnish their results during the appointment:

- blood group
- full blood count
- blood coagulation system
- erythrocyte sedimentation rate
- glycaemia
- ionogram
- ECG (after the age of 45)

The tests should be performed not earlier than 3 days before the surgery.

Other requirements:

- good general health of the patient (e.g. no infections, inflammations)
- the patient should be in a fasting state 6 hours before the surgery
- smoking should be reduced 4 weeks before the surgery
- 2 weeks before the surgery, the patient should not take any medicines which contain acetylsalicylic acid (e.g. aspirin), as these extend the blood coagulation time
